

Help Protect Services for the Intellectual/Development Disability Population

What do I say?

Say what comes from your heart....that you, your loved, or the people you provide services for, cannot accept a reduction in the amount or in the quality of services! If you want more specific talking points, here they are:

- b/c Combo Managed Care Waiver does not guarantee DD services
- Please add the 1915i option or other DD service guarantees
- Families/advocates need to be at the table!
- Slow down, talk to people that will be impacted, let consumers and their families and providers give you their input
- Individuals with DD don't need a medical recovery system, they need sustained habilitation and on-going support services
- Don't do away with independent case management
- Express concern about how the waiver will impact existing services
- How will existing services be preserved?
- Please avoid funding cuts for critical DD services. Preserve and protect current level of services.
- The DD Community - including consumers, families, and providers is not in support of the b/c Combo waiver!

To whom do I say it?
